

## Readme file

Steps needed to be followed to install or deploy

1. Install Visual Studio code for a development environment.
2. Ensure that you have Node.js

Once the installations are done. Open terminal,

1. Navigate to the client directory:  
cd client
2. Install all client dependencies listed in package.json  
npm install
3. Start the client application  
npm start

This will launch the client app in your default web browser.

Open a new terminal and navigate back to the root directory.

1. Navigate to the server directory:  
cd server
2. Install all server dependencies listed in package.json  
npm install
3. Start the client application  
npm start

The server will be running on a specified port.

Once the setup is done, the web application can be accessed at 'http://localhost:3000/'
